

AI Readiness: Talent Acquisition Leaders Masterclass

Robert—
Walters

Our AI Masterclass equips talent acquisition leaders with the knowledge and critical analysis to become an effective and informed leader, confident in the benefits, use-cases and considerations of leveraging AI throughout the talent acquisition value chain.

- Easy-to-understand & jargon-free.
- Actionable insights for immediate impact.

Curated exclusively for talent acquisition leaders, designed by our award-winning “Future of Work” Advisory practice.

Why is understanding AI in the specific context of Talent Acquisition Critical?

AI is transforming the both employers hire and the way candidates research and apply for jobs. AI can unlock significant benefits: from lower cost of hire to increased quality of hire, yet few talent acquisition leaders are leveraging these benefits.

Talent acquisition leaders must also be informed of the risks of AI; from AI-infused applications to deepfake candidates and the ethical and bias implications

With Robert Walters’ AI Readiness Masterclass, you will gain critical insights into how to responsibly deploy AI in talent acquisition.

Get in touch to find out how we can help you to unlock the benefits of AI.

Masterclass & Toolkit

- Impartial, expert Masterclass delivered by recognized leaders in AI & the Future of Work.
- **Comprises 5 virtual 121 learning sessions** and AI Readiness: HR Leaders Masterclass Coursebook & optional enrichment.
